Bricks will be placed in the walk path within each section purchased and will be placed nearest the gate, within that section, based upon the date the bricks were ordered.

Preferred seat inscription location will be determined based upon the date inscriptions were purchased and the number purchased on an order. Inscriptions will be placed on the seats starting on the Home Side, at the 50 yard line, Row 1 and alternating around the 50 Yard Line – north side, then south side. When Row 1 is completed, the process will be repeated for Rows 2 – 8. This process will advance to the Visitor side and be repeated until all inscriptions are placed. All "other" seat inscriptions will follow the same process beginning at the 50 yard line on Row 9. Orders with several seat inscriptions will be placed in sequential order on the same row if possible.

Every effort will be made to place bricks and locate seat inscriptions as described above, but is not guaranteed. The final size and location of brick and seat inscriptions may be altered by architecture and construction needs. This may include placing inscriptions on individual seats or a combination of individual seats and benches. The placement of a donor's inscription on a given seat does not provide that donor any seating rights to a given seat. The purchase of a ticket is required for all events where tickets are sold.
